American RFID Solutions eLearning

Our RFID eLearn Center sets new standards for blended learning in web-based environments. Our training sessions are fun and engaging and increase the effectiveness of learning programs with proven educational principles.

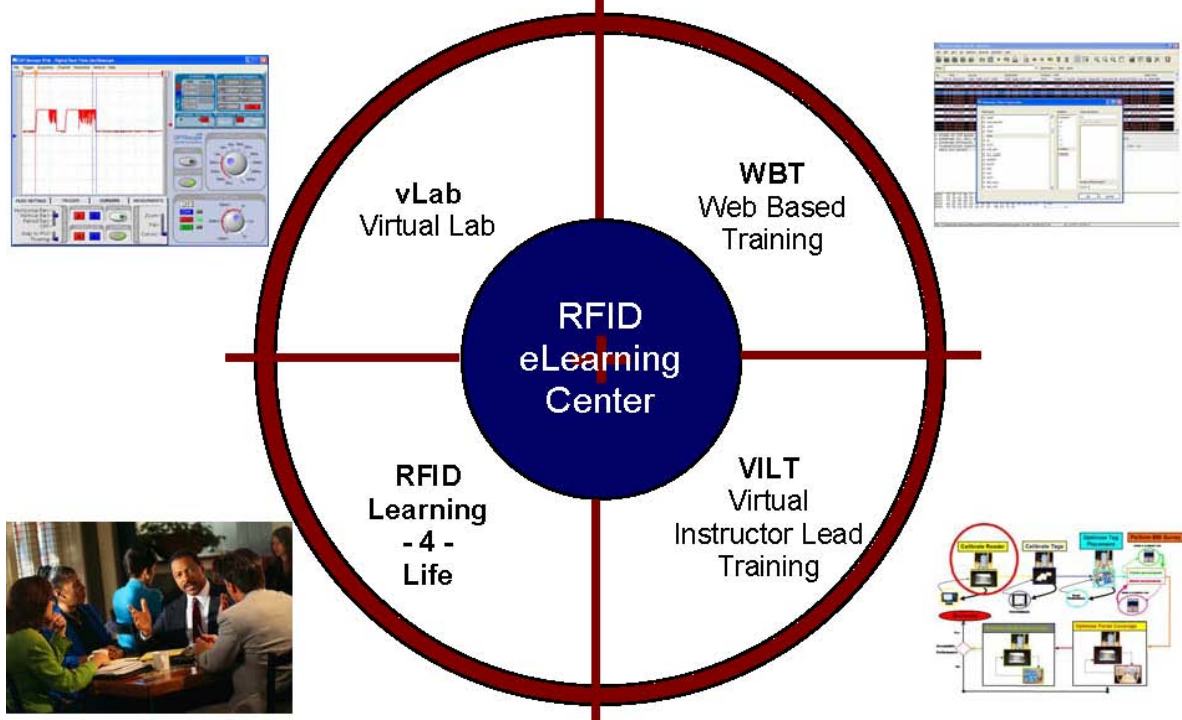

The RFID eLearn Center increases the convenience and greatly reduces the cost of training by delivering learning activities directly to individuals throughout an enterprise at the time and place of the individuals' choosing. Furthermore, all courses include pre and post assessments in the classes, which assist greatly in preparing for industry certifications such as the CompTIA RFID+ and ISCEA RFIDSCM.

Benefits of American RFID Solutions innovative eLearn Center include:

- Learners have global, **24 X 7 X 365** access to RFID web based training
- Fast roll-outs of RFID curriculum updated seamlessly
- Potential for training department to become profit center through branded portals
- Standard, approved course content for employees, customers and partners
- Reduced training and travel costs

ARS offers a complete line of eLearning solutions, ranging from off-the-shelf web based classes to custom developed courses for specific organizational needs.

RFID eLearn Center Targets

American RFID Solutions innovative and targeted eLearning training methods go far beyond typical 'stare and glare' course content. Four delivery methodologies present RFID topics in **fun and dynamic** means to increase the student's attention and knowledge absorption.

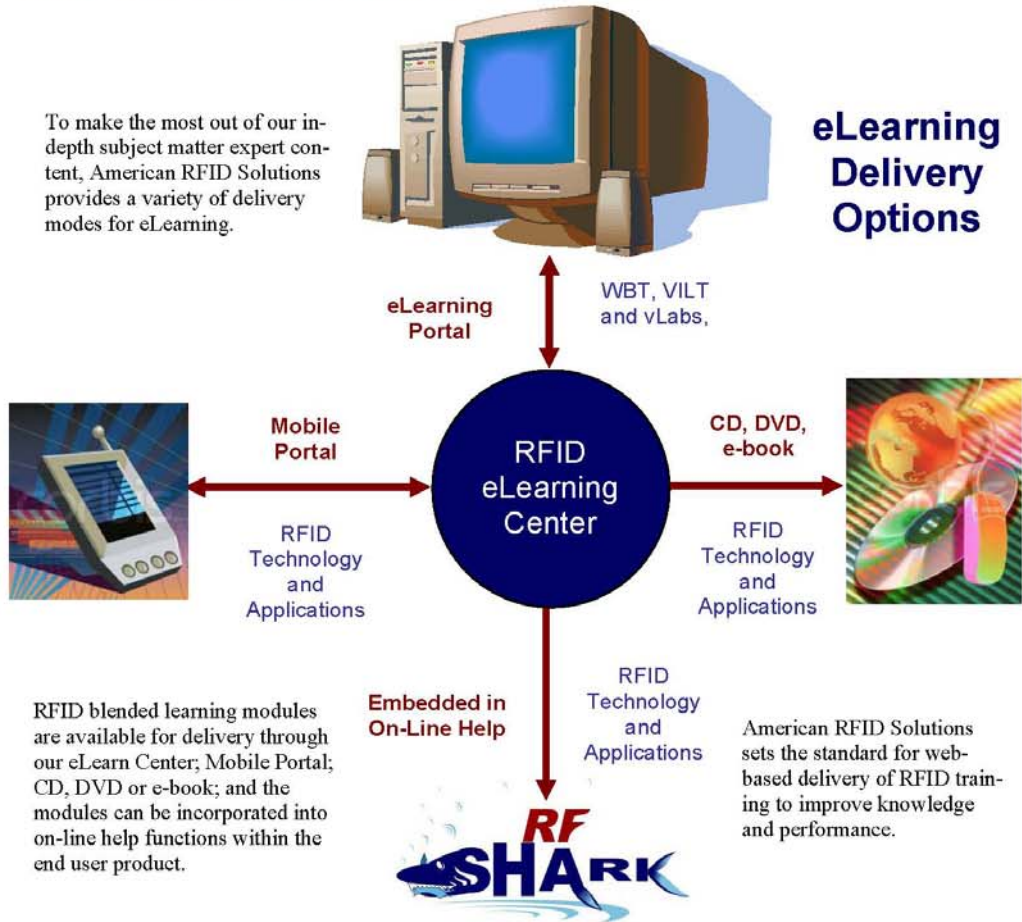

Virtual **Laboratory Experiments** (vLabs): vLabs are interactive and useful in teaching RFID technology and RFID technology related products. vLabs include text, video and **interactive** hardware and software emulation. vLabs cover topics such as Protocol Stepping from the "Tag's Eye", Tag Calibration, Optimized Tag Orientation, Read Redundancy Evaluation and many more.

Virtual Instructor Lead Training (VILT): American RFID Solutions is a recognized **subject matter expert** in RFID and currently offers a broad range of instructor lead courses. VILT leverages the developed course materials to create VILT courses that do not require travel and can be schedule over time, while maintaining the benefits of interactive **synchronous training**.

RFID Web Based Training (WBT): WBT includes full courses and modular classes on RFID Fundamentals and the leading certification preparation tracks. WBT and VILT include subject matter expert "office hours" to enable students to ask questions and discuss topics of interest with the experts.

American RFID Solutions **Learning 4 Life** suite of training products include Instructor Led Training (ILT), Virtual Instructor Led Training (VILT), Web Based Training (WBT) and Virtual Labs (vLabs). This holistic approach provides subject matter expertise across the most comprehensive training modes offered in the industry.

RFID eLearning Delivery and Content Development

Features and Benefits of RFID eLearning	
Web Delivery vs. On-the-Job Training	Online training frees time of key employees that typically do the RFID training.
Web Delivery vs. Traditional Classroom	Cut down on travel expenses to remote training classrooms or for bringing remote staff to the home office; large time blocks are no longer needed.
Rewind and Review Capability	The training attendee can rewind and review the material if they need reinforcement.
Engaging Full Motion Video and Software Emulation	An engaged learner will retain more of the material presented. The RFID vLabs and WBT utilize the latest technology in flash animation, video and sound to facilitate interactive RFID training.
Anytime Access	Courseware is available 24X7 for the duration of the subscription. Employees can access the courses over and over until the material is mastered.

eLearning Course and Delivery Design

American RFID Solutions courses are designed to stream with no adverse affects at baud rates as low as 28.8 kbps with full audio, graphics and animation. Our Learning Management System (LMS) can support up to 50,000 simultaneous course takers from secure servers.

Our classes are custom developed by RFID subject matter experts to address your specific RFID educational needs. We update the courses on a regular basis and many subscription users retake the same courses as refreshers. Courses are available through web based training, virtual instructor led training, on CDs and within leading RFID products.

FEMA Class 1 Building

American RFID Solutions has taken measures to insure access to our eLearn Center. Web production and database servers are hosted in a FEMA Class 1 building, where the emergency 911 system is also hosted for the Southeast US. Physical security is considered a serious matter at our hosting facility. American RFID Solutions guarantees your satisfaction and has invested in infrastructure to ensure a professional and enjoyable delivery of RFID training materials.

Easy To Use!

Log into your personalized eLearn Center to view:

- Featured RFID Courses
- Your Enrollment Calendar with scheduled Instructor Led, Virtual Instructor Led and Forum dates
- Your transcript with certification and class records
- Release dates of upcoming RFID Courses

ISCEA.HK American RFID Solutions eLearning is your one stop for all RFID web based training.
